

#### Tópicos Abordados • Tags do JSF • JSF HTML Tags e Core JSF Tags • Tags sem representação gráfica • Textos e imagens • Caixas de texto • Campos hidden • Checkboxes, Radio buttons, Menus e Listboxes • Botões e Links • Paineis • JavaScript e Componentes JSF

Resources

### Páginas JSF são compostas por tags JSF suporta 6 bibliotecas de tags Nome Namespace Prefixo HTML http://java.sun.com/jsf/torl h: Core http://java.sun.com/jsf/core f: Facelets http://java.sun.com/jsf/acelets ui: Composite Components http://java.sun.com/jsf/storle composite: JSTL Core http://java.sun.com/jsp/jstl/core c: JSTL Functions http://java.sun.com/jsp/jstl/functions fn: As tags padrão do HTML também são suportadas

```
ch:panelGrid columns="2">

cf:facet name="header">

ch:outputText value="Cadastro de Cliente" />

cf:facet)

ch:outputText value="Nome:" />

ch:outputText value="fbean.nome" />

ch:outputText value="#[bean.email]" />

ch:inputText value="#[bean.email]" />

ch:outputText value="#[bean.email]" />

ch:outputText value="Bindereco:" />

ch:inputText value="Bindereco:" />

ch:inputText value="fbean.endereco]" />

ch:inputText value="fbean.endereco]" />

ch:inputText value="fbean.telefone:" />

cf:facet name="footer">

cf:facet name="footer">

ch:commandButton value="OK" action="#{bean.cadastrar}" />

c/f:facet>

c/h:panelGrid>
```

## ID de um Componente • Todo componente pode ter um ID associado • Um componente com ID pode ser referenciado: • Por outros componentes JSF • No código Java • Em chamadas JavaScript <a href="fig:4"txtNome" value="#{bean.nome}"/> \*h:inputText id="txtNome" value="#{bean.nome}"/>

#### 

# Outros Componentes JSF O JSF possui um conjunto nativo de componentes simples Possibilita que novos componentes sejam criados Algumas bibliotecas de componentes gratuitas ICEFaces http://www.icefaces.org PrimeFaces http://www.primefaces.org RichFaces http://www.jboss.org/richfaces Apache Tomahawk http://myfaces.apache.org/tomahawk
